UniBloc Analytical Balances

ATX/ATY Series

Easy Setting Best fit to weighing application

Quickly adjust the desired ratio of stability and response for every application, even during measurement, with one-touch operation.

Calibration record

You can leave a record of execution of calibration. With serial number and ID of balance.

Large pan size

This model has the largest weighing pan in the class (91mm diameter).

Multiple weighing units

In addition to grams (g), weigh in ct, mg, oz, etc. or a custom conversion units.

Expanded Piece Counting Function

Unit weights of up to 5 different samples can be easily entered, stored and recalled for

Comparator Function

Compare samples to target values or pass/fail criteria and clearly indicate the results.

Formulation Mode

Convenient for making many measurements of minute samples and seeking the total mass.

% measurement

The weight of the sample is converted to a percentage of the reference weight.

Power saving function

When weighing operation ends. Power automatically turns off after a fixed or pre-set time.

WindowsDirect Communication Function

Send balance data to Excel or other Windows applications without any data communication software installation required. By combining standard AutoPrint functions with typical spreadsheet functions, even difficult applications can be easily automated.

*RS232C interface is needed.

Password lock

In order to ensure that the menu settings are not changed by mistake, the person managing the Balance controls the password and can prohibit menu operation.
